K8S Liveness Readiness

RODRIGO PICHIÑUAL DEVOPS rodrigo.pichinual@zentagroups.com

Types of Health Checks K8S

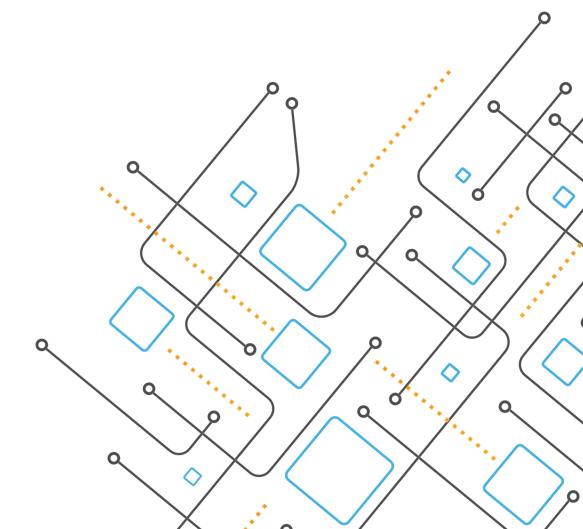

LIVENESS PROBE - Pod is Live?

READINESS PROBE - Pod is Ready?

Types of Probes K8S

- HTTP (Get) Endpoint
- Command
- TCP (check Port)

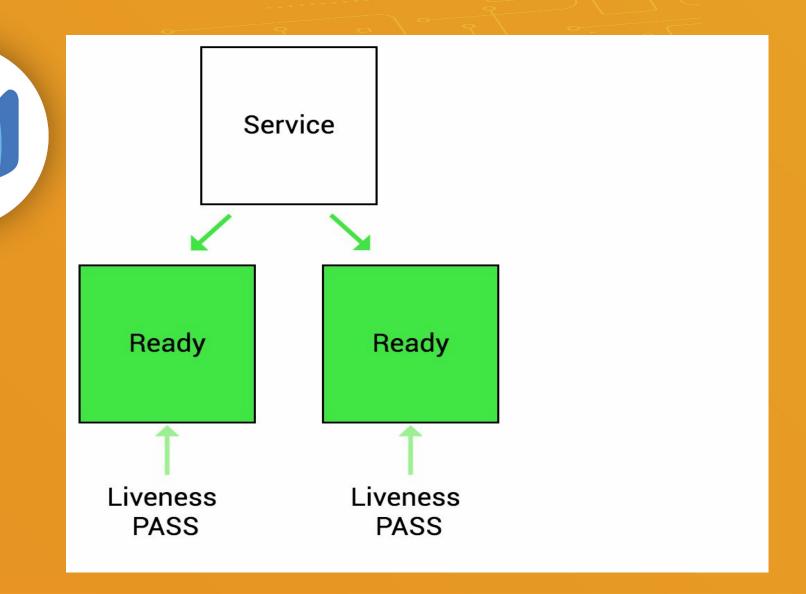

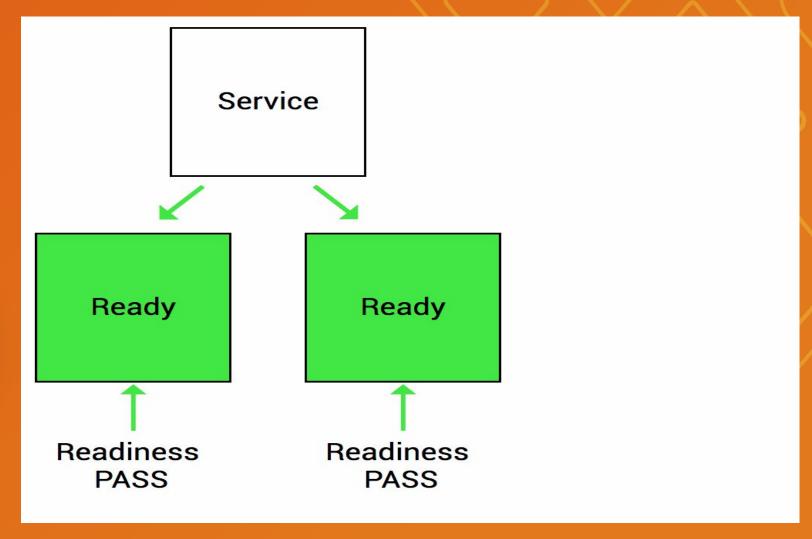

```
spec:
   containers:
   - name: liveness
   livenessProbe:
     httpGet:
       path: /healthz
       port: 8080
```

Liveness

Readiness

SPRING BOOT 2.x ACTUATORS

QUE HACEN LOS ACTUATORS?

- Supervisan nuestra aplicación
- Recopilan métricas

- Comprenden y analizan el tráfico y el estado de nuestra base de datos, y todo ello sin falta de tener que implementarlo por nuestra cuenta.
- Los Actuators se utilizan principalmente para exponer información operacional sobre nuestra aplicación en ejecución. (health, metrics, info, dump, env, etc.)

Request CurL

```
rootdrigo@MacBook-Pro-de-NB-ZENTA: ~

curl localhost:8080/actuator/health | jq
% Total % Received % Xferd Average Speed Time Time Time Current
Dload Upload Total Spent Left Speed

100 15 100 15 0 0 535 0 --:--:-- 555

{
"status": "UP"
}

~ _
```
